PROFESSIONAL SUMMARY

Data Analyst with 4+ years at Google DeepMind engineering ETL pipelines, BigQuery monitoring systems, and BI dashboards for AI and robotics research teams. MS in Data Analytics (2025). Expert in SQL, Python, and Tableau — translating multi-terabyte operational data into executive-ready insights that reduce reporting latency, surface quality failures, and drive measurable efficiency gains.

TECHNICAL SKILLS

Data Analysis:	SQL (BigQuery, MySQL, PostgreSQL), Python (Pandas, NumPy), R, Statistical Analysis, A/B Testing & Experimentation
Visualization & BI:	Tableau, Power BI, Looker Studio, RFM Analysis, Cohort Analysis, KPI Dashboard Design, Dashboard Automation
Engineering:	ETL Pipeline Design, Data Modeling, Data Quality Testing, Advanced Excel, Git & Version Control
Domain:	AI/LLM Performance Analytics, Product Analytics, Business Requirements Analysis, Stakeholder Reporting

PROFESSIONAL EXPERIENCE

Google DeepMind (via Relentless Adrenaline)

Mountain View, CA

Data Analyst & Operations Supervisor · Jan 2022 – Present

- Reduced executive reporting latency by 15+ hours/week by architecting 5+ automated ETL pipelines and BI dashboards in SQL and Google PLX, giving leadership real-time operational insights without manual data pulls.
- Raised data usability to a consistent 80% threshold by engineering BigQuery data-integrity auditing scripts to continuously monitor multi-terabyte production logs, eliminating silent data quality failures across LLM research pipelines.
- Contributed statistical validation methodology cited in 3 peer-reviewed publications by quantifying LLM performance on robotics fleets through rigorous success/failure trial analysis, directly informing model improvement decisions.
- Boosted operator output by 15% by leading weekly stakeholder KPI reviews that shaped budget allocation and timeline forecasting, translating data-driven roadmaps into measurable throughput gains.
- Scaled lab operations from 1 to 3 facilities and headcount from 20 to 60+ operators by spearheading end-to-end infrastructure buildout to support 7x research demand growth.

Nuro

Mountain View, CA

Operations Specialist & Data Analyst · Feb 2020 – Jan 2022

- Maintained 95% task success rate in autonomous vehicle R&D by analyzing edge-case failure logs and delivering structured performance feedback to engineering, accelerating safety-critical validation cycles.
- Improved fleet uptime by tracking vehicle system performance metrics through diagnostic dashboards, identifying recurring downtime patterns and surfacing data-driven findings to engineering teams.

PORTFOLIO PROJECTS

Robotics Lab Operations Dashboard

MySQL · Python · Tableau

- Designed 5,000-record synthetic robotics dataset and wrote 6 SQL queries analyzing robot performance, failure root causes, operator KPIs, and shift trends across 8 robots and 8 task types.
- Identified R004 & R007 as lowest performers at 63% success rate and Vision Occlusion as top failure cause (14.6%); Tableau dashboard replicates real-world lab supervisor workflows.

Customer Segmentation & RFM Analysis

MySQL · Python · Tableau

- Analyzed 541,909 UK retail transactions; applied RFM scoring via SQL NTILE window functions to segment 4,339 customers into 6 actionable revenue tiers.
- Identified 82% revenue concentration in the UK and a \$1.16M November holiday spike; executive dashboard surfaced geographic risk and seasonal patterns for strategic planning.

HR Attrition Analysis

MySQL · Python · Tableau

- Analyzed 1,470 IBM HR records; found Sales Representatives leave at 39.76% (nearly 3x company average) and overtime employees at 30.53% vs. 10.44% for non-overtime workers.
- Built composite flight-risk scorecard using SQL CASE logic scoring employees across 6 risk factors; Tableau dashboard identified top 20 at-risk employees for proactive HR intervention.

Olist E-Commerce Performance Intelligence

MySQL · Python · Tableau

- Ingested 100,000+ Brazilian e-commerce orders across 7 relational tables using Python ETL and MySQL; wrote 6 business-driven SQL queries covering revenue trends, delivery KPIs, and seller performance.
- Identified 23%+ late delivery rates in AL and MA correlated with lower customer review scores; Tableau dashboard surfaced revenue leakage and logistics bottlenecks for strategic correction.

EDUCATION

Master of Science in Data Analytics · Eastern University

July 2025

Bachelor of Science in Computer Science · California State University, East Bay

June 2020
